We provide local service on a global scale, maximising equipment availability, optimising productivity and safeguarding the competitive advantage.

### Our comprehensive service offers:

- Planned preventative maintenance
- Remote monitoring and assistance
- Priority response for emergency breakdowns
- Spare parts
- Training.

# End of line

Machines and systems.

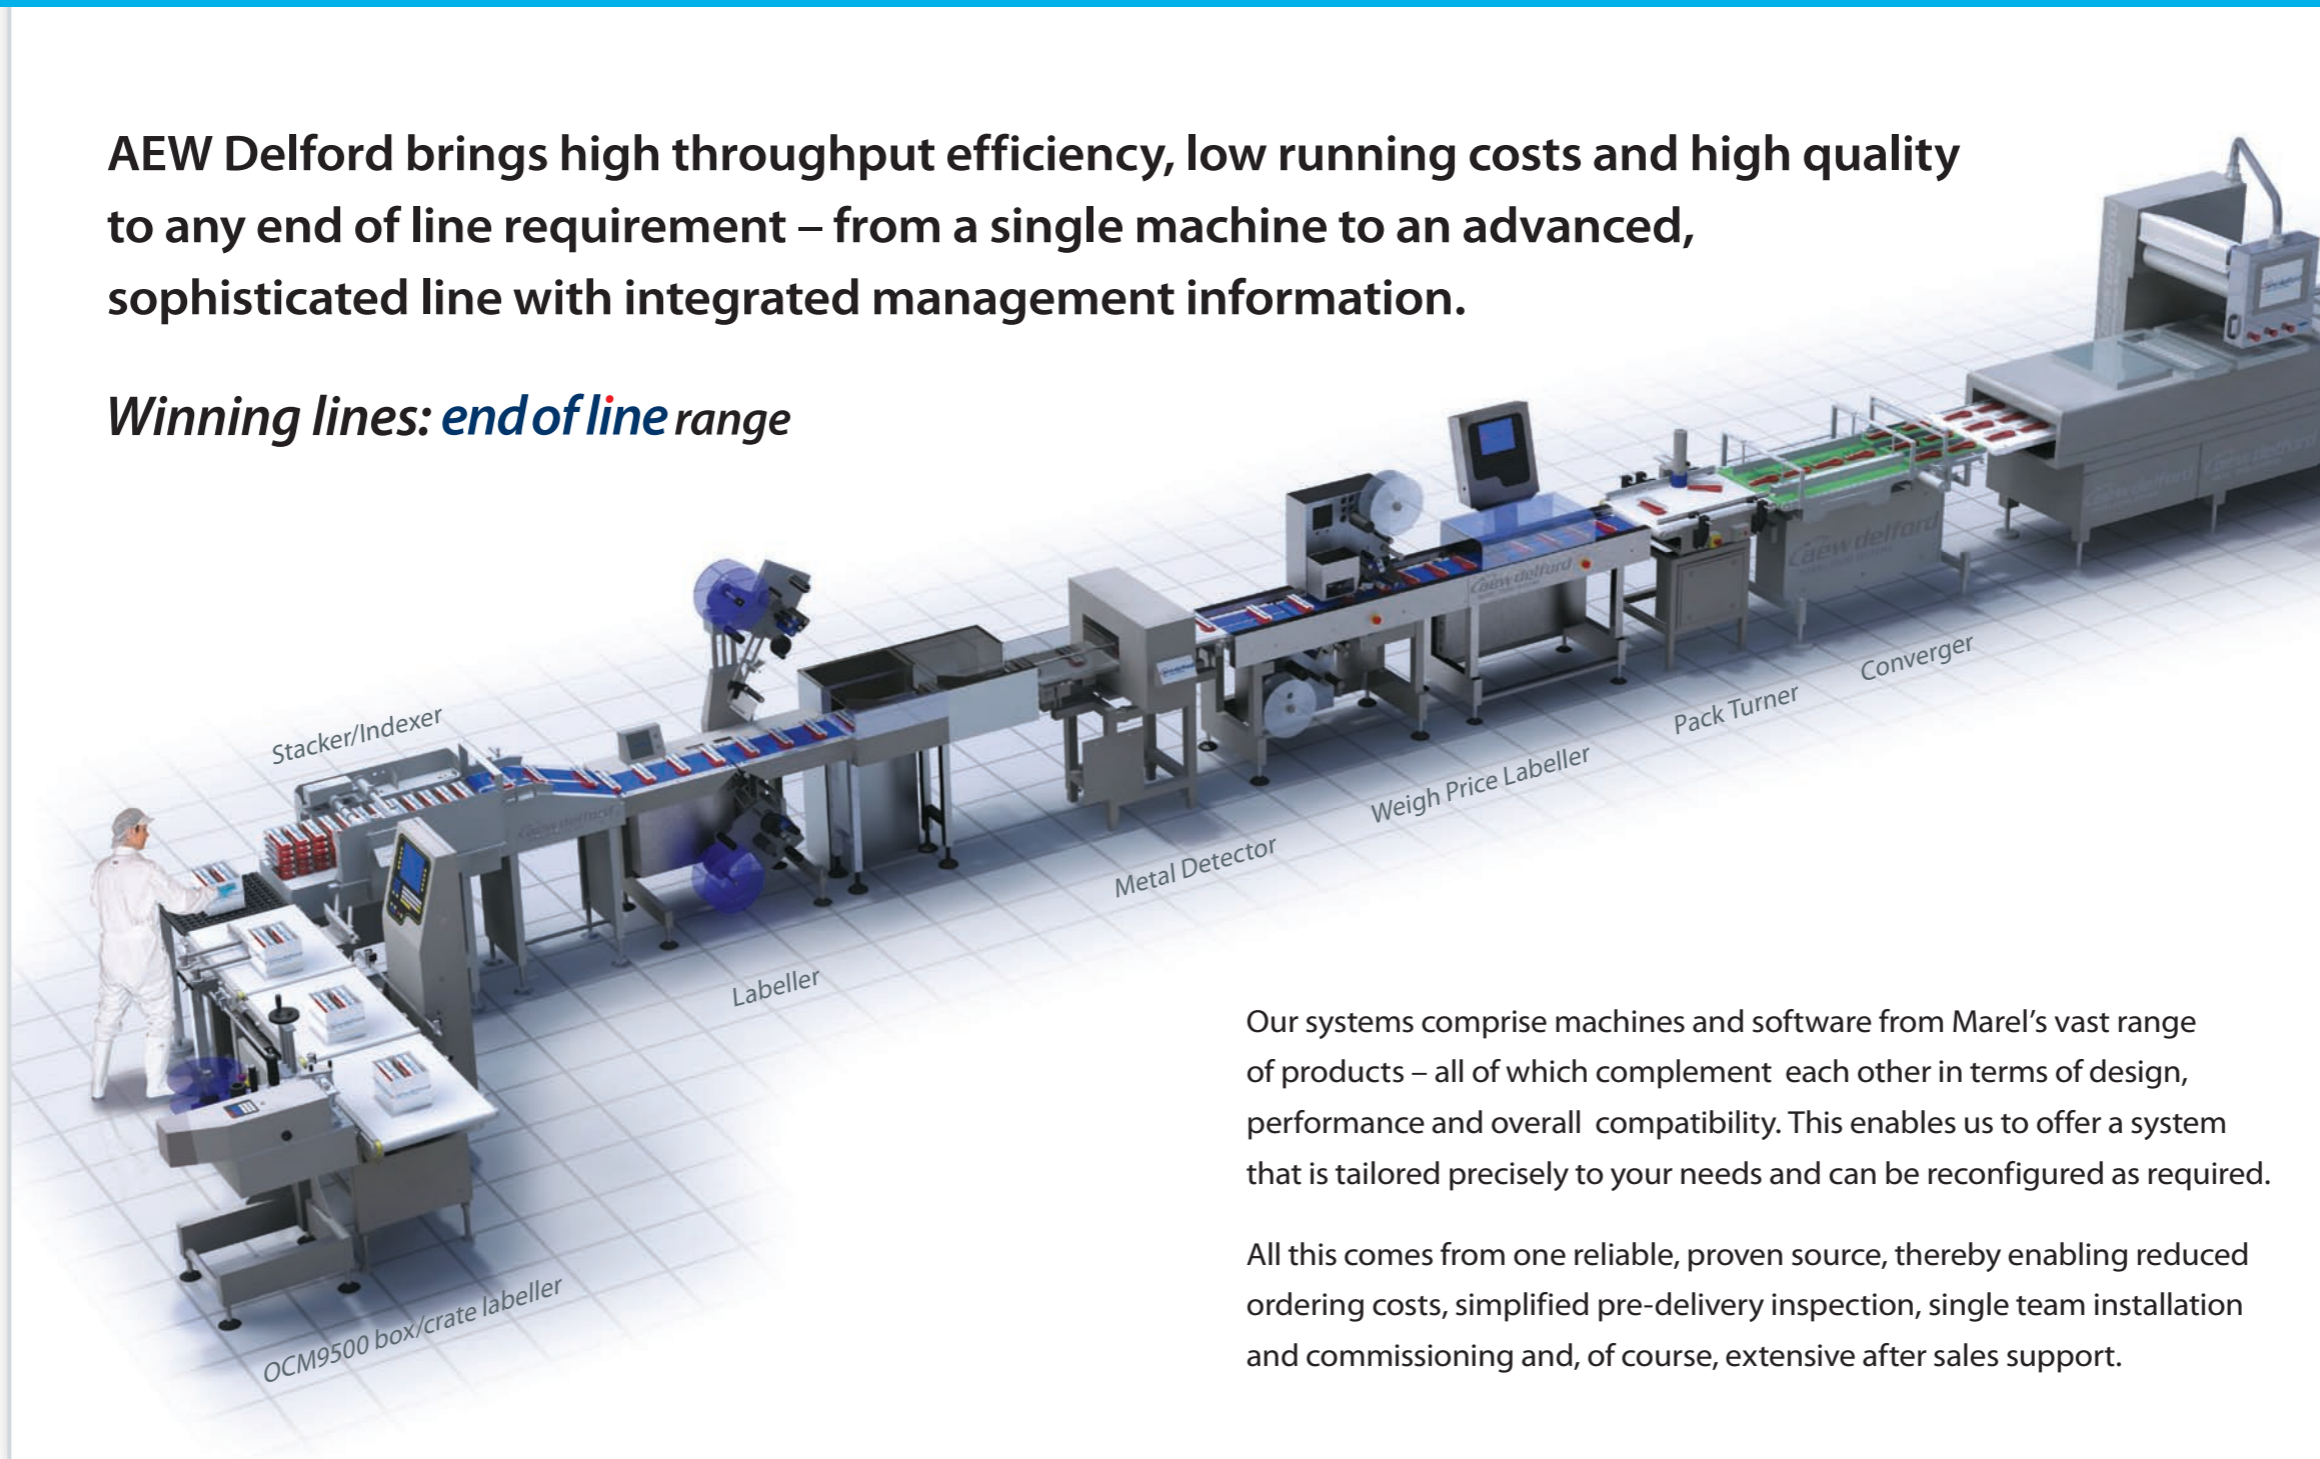

# Presentation, accuracy, timing and control.

AEW Delford brings high throughput efficiency, low running costs and high quality to any end of line requirement – from a single machine to an advanced, sophisticated line with integrated management information.

## Winning lines: *end of line range*

Our systems comprise machines and software from Marel's vast range of products – all of which complement each other in terms of design, performance and overall compatibility. This enables us to offer a system that is tailored precisely to your needs and can be reconfigured as required.

All this comes from one reliable, proven source, thereby enabling reduced ordering costs, simplified pre-delivery inspection, single team installation and commissioning and, of course, extensive after sales support.

**LS40**  
Compact entry level label applicator for promotion and description labelling.
