

Innova Packing Lite

Weighing and labelling

The Innova Packing Lite system offers a cost-efficient solution for weighing and labelling of outer cases

Every food processing plant nowadays needs software to produce barcode labels for boxes meant for external distribution. In recent years, customers have demanded that the barcode labels contain more and more information for traceability purposes.

The module works stand-alone and can be upgraded at a later stage to form part of a complete and integrated Innova production control system.

Key benefits

- Easy, fast and cost-effective implementation.
- Unique label serial number supports traceability.
- Runs on Microsoft SQL Express (free-of-charge version).
- Stand-alone M2200 and M1100 can be connected.
- Fast and reliable reporting of packing process.
- Upgradeable to full Innova license for additional modules.
- 1st year maintenance is included in the price.

Key Features

- Supports up to five packing stations.
- Works with Marel M2200 and M1100 indicators (Ethernet required).
- Has built-in support for checkweighing of outer cases.
- Supports an infinite number of product lists for packing.
- Offers a large number of standard reports, including for packing lists, packing over- and underweight and checkweighing.
- Manual or automatic tare setting.
- Comes with pre-defined label designs (two as default).
- Two or more indicators can share one label printer.

Options

Capacity of five packing stations

Innova maintenance agreement

SLA for hot-line and help-desk calls

Innova modules required

- Innova Packing Lite

Marel hardware that module is compatible with

- M2200 indicator
- M1100 indicator (requires ethernet card)
- Bench scales in range from 1,5 kg to 60 kg
- Intermec PF4i and PM4i label printers

Possible Innova Packing Lite configurations
