# SAFETYCHAIN

SUPPLIER MANAGER

Move Supplier Compliance Into The Cloud

SafetyChain Supplier Manager provides a cloud-based, centralized solution that makes managing supplier compliance faster, easier, and more effective. From facility audits and scoring to user-friendly supplier portals and scorecarding, SafetyChain gives your suppliers and audit team a single tool to streamline their processes, reduce risk, and improve overall performance. Put an end to back-and-forth emails about expiring certificates and other supplier details with a convenient and secure supplier network.

Eliminate Paper & Protect Privacy With A Private Supplier Network

Protect your confidential documentation and make it easy for your suppliers to do business with you by offering a private, user-friendly portal to digitally share and capture requirements that eliminate paper and manual processes, resulting in significant time savings for both parties.

Key Benefits

Own your private supplier network

Control your documents

Save time & eliminate paper

Centralize access & storage
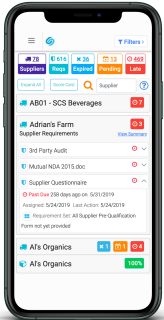

Improve supplier performance

Monitor risk in real-time

Simplify processes for suppliers

Reduce risk across supply chain

Gain enterprise-wide traceability

Get full visibility w/ roll-up reporting

Reduce Risk With Assessments, Scorecards, & Traceability

Track, score, and manage all of your vendors with integrated supplier scorecards and risk assessments. Get complete corporate visibility and traceability across your supply chain on any device to determine potential risks and reduce the chances of returns, rework, or recalls.

Streamline Supplier Compliance & Audits

Manage, audit, score, and enforce supplier standards with configurable compliance tools that provide real-time visibility and control across the enterprise. Easily complete audits or update processes with instant access to documents, records, and tasks for all facilities.
